

DATA SCIENCE TASK LIST

Internship Program

4-Week Practical Learning Program

ABOUT US

Auspify Technologies is a technology and training platform dedicated to helping students build industry-ready skills through internships and project-based learning.

We bridge the gap between academics and industry by providing practical experience, real-world projects, and hands-on training.

Our focus is on empowering learners with the knowledge, confidence, and professional skills needed to succeed in their careers.

Learn • Build • Grow

INTERNSHIP OVERVIEW

A 4-week remote internship program designed to provide practical learning, real-world project exposure, and industry-relevant skill development.

Features :

- Flexible Learning Schedule
- Hands-On Tasks & Projects
- Beginner-Friendly Structure
- Portfolio Building Support
- Industry-Oriented Experience

Open To: Students, Freshers, Self-Learners & Aspiring Developers

PROFESSIONAL GUIDELINES & SHOWCASE

Professional Guidelines :

- Complete assigned tasks responsibly and within deadlines.
- Ensure all submissions are original and plagiarism-free.
- Maintain organized folders for each task and project.
- Follow professional standards in communication and project delivery.

Professional Showcase :

Interns are encouraged to share their internship journey and projects to build a strong professional presence.

Benefits :

- Strengthen Your Portfolio
- Increase Professional Visibility
- Demonstrate Practical Skills
- Expand Networking Opportunities

Share : Project Screenshots, Demos, Milestones, Learning Achievements, and Project Walkthroughs.

Hashtags : #Auspify #AuspifyTechnologies
#AuspifyInternship #AuspifyProjects

DATA SCIENCE

Task List

Welcome to our Data Science Internship Program!

Throughout this internship, you will work on 6 practical Data Science tasks designed to enhance your data analysis, machine learning, statistical modeling, and problem-solving skills using Python and modern data science tools. To successfully complete the internship, you need to finish **any 4 out of the 6 tasks** based on your interests, skills, and learning goals.

Task 1 (Easy) – Data Cleaning & Preprocessing

Description : Prepare the Netflix dataset for analysis by cleaning, transforming, and organizing raw data.

Task Workflow

- Step 1: Import the dataset using Pandas.
- Step 2: Identify missing and duplicate records.
- Step 3: Handle null values and inconsistent formats.
- Step 4: Transform categorical and date-related columns.
- Step 5: Create a clean dataset for further analysis.

Skills You Will Learn

- Pandas
- Data Wrangling
- Feature Engineering
- Data Preprocessing

Key Features

- Data Cleaning
- Missing Value Treatment
- Data Transformation
- Data Preparation

Task 2 (Easy) – Exploratory Data Analysis (EDA)

Description : Explore the Netflix dataset to uncover trends, patterns, and insights.

Task Workflow

Step 1: Analyze dataset structure and statistics.

Step 2: Study content distribution by type.

Step 3: Identify top countries and categories.

Step 4: Create visualizations for key metrics.

Step 5: Summarize findings.

Skills You Will Learn

- EDA Techniques
- Matplotlib
- Seaborn
- Data Interpretation

Key Features

- Statistical Analysis
- Data Exploration
- Visualization
- Trend Discovery

Task 3 (Medium) – Recommendation System Analysis

Description : Develop a basic content recommendation model based on Netflix titles and categories.

Task Workflow

- Step 1: Extract relevant content features.
- Step 2: Perform text preprocessing.
- Step 3: Calculate content similarity.
- Step 4: Generate recommendations for selected titles.
- Step 5: Evaluate recommendation quality.

Skills You Will Learn

- **NLP Fundamentals**
- **Scikit-Learn**
- **Recommendation Systems**
- **Feature Engineering**

Key Features

- **Content Recommendation**
- **Similarity Analysis**
- **Feature Extraction**
- **Predictive Insights**

Task 4 (Medium) – Trend Prediction Analysis

Description : Analyze historical content trends and forecast future content growth.

Task Workflow

- Step 1: Prepare release-year data.
- Step 2: Analyze yearly content trends.
- Step 3: Build forecasting models.
- Step 4: Visualize future predictions.
- Step 5: Interpret results.

Skills You Will Learn

- **Time Series Analysis**
- **Forecasting Techniques**
- **Model Evaluation**
- **Predictive Analytics**

Key Features

- **Trend Analysis**
- **Forecasting**
- **Predictive Modeling**
- **Data Visualization**

Task 5 (Advanced) – Machine Learning Classification Model

Description : Build a machine learning model to classify Netflix content based on available features.

Task Workflow

- Step 1: Select and prepare features.
- Step 2: Split data into training and testing sets.
- Step 3: Train classification models.
- Step 4: Evaluate model performance.
- Step 5: Compare model accuracy.

Skills You Will Learn

- **Machine Learning**
- **Scikit-Learn**
- **Classification Algorithms**
- **Model Validation**

Key Features

- **Classification Modeling**
- **Feature Selection**
- **Model Training**
- **Performance Evaluation**

Task 6 (Advanced) – Data Science Business Insights Dashboard

Description : Create an end-to-end data science project that combines analytics, machine learning, and business insights.

Task Workflow

Step 1: Perform complete data analysis.

Step 2: Develop predictive models.

Step 3: Create interactive visualizations.

Step 4: Generate business recommendations.

Step 5: Present findings in a professional report.

Skills You Will Learn

- **Data Science Workflow**
- **Predictive Analytics**
- **Dashboard Development**
- **Data Storytelling**

Key Features

- **End-to-End Data Science Project**
- **Machine Learning Integration**
- **Interactive Dashboard**
- **Business Insights**

INTERNSHIP OVERVIEW

Project Submission Process:

Interns are required to submit the following:

- Project Source Code
- Screenshots of Completed Tasks
- GitHub Repository Link (if available)
- Project Demonstration Video (optional)

A submission form or portal will be shared separately for final evaluation and project verification.

EVALUATION CRITERIA

Project Evaluation Parameters:

Projects may be evaluated based on:

- Task Completion
- Code Quality
- Website Responsiveness
- User Interface Design
- Creativity & Implementation
- Professional Presentation
- Project Functionality

CERTIFICATION

Internship Completion Recognition

- Internship Completion Certificate
- Project Completion Recognition
- Internship Experience Acknowledgment

Certification eligibility depends on:

- Successful task completion
- Proper project submission
- Basic project verification
